

Tyre Guide

MOTOZ

Lindsay Bond owns and operates KTM Trail Tours Australia and covers plenty of ground in the NSW South Coast and the Victorian and NSW border country. Bondy's been around bikes most of his life and, despite enjoying plenty of racing in his junior years, these days he spends most of his time on the trails.

"I use the Motoz Tractionator X-Circuit on the front and run the Tractionator Enduro on the rear. Our sweep rider Robbo prefers the Tractionator Enduro on the front. This combination works well in the areas we ride where it varies between loamy black soil, hard packed with leaf litter and hard shale.

"We get over 1500km out of the Tractionator rear tyres and more out of the front. We had a great run out of the Tractionator Enduro riding through the Victorian High Country last year. We covered more than 1600km on one particular tour.

"I raced a grass track motocross meeting last year and ran with the Tractionator Enduro X-Circuit 130/90 -18 on the rear and, boy, did that tyre pick up and shoot me off the starts. I smoked it until about the second lap when the old fitness thing kicked in.

"I also ran the X-Circuit on the front and it worked awesome. Although the grass-track motocross was fun I think I'll be better off sticking to my trailriding."
